User Guide
How to use Exception and Mobile Theme
By SBND Technologies

fcms.sbnd.net

1) Open root/themes/your_theme/support.ini

Device=min version

Browser=min version

2) Remove comment symbol in front of firefox=5

```
1. ;android=0
2. firefox=5
3. ;msie=7
4. ;opera=11
5. ;chrome=14
6. ;safari=6
```

If the website is opened with Firefox version earlier than 5 the website will use exception theme root/themes/your_theme/exception

3) Add exception theme – download example exception theme and put content in folder: root/themes/your_theme/exception

4) Remove comment symbol infornt of android=0

The website will now use mobile theme root/themes/your_theme/exception/mobile

Full list with mobile device that will be recognized:

```
1. "android"         => "android.*mobile",
2. "androidtablet"    => "android(?!.*mobile)",
3. "blackberry"       => "blackberry",
4. "blackberrytablet" => "rim tablet os",
5. "iphone"          => "(iphone|ipod)",
6. "ipad"            => "(ipad)",
7. "palm"            => "(avantgo|blazer|elaine|hiptop|palm|pl
   ucker|xiino)",
```

```
8. "windows"           => "windows ce; (iemobile|ppc|smartphone)
   ",
9. "windowsphone"            => "windows phone os",
10.    "generic"       => "(kindle|mobile|mmp|midp|pocket|ps
   p|symbian|smartphone|treo|up.browser|up.l
11.    ink|vodafone|wap|opera mini)"
```
